

TWS FELLOWS PROGRAM

2016 – Rick Baydack

Position: Professor, University of Manitoba

Accomplishments: Dr. Rick Baydack has been a long-term and active member of The Wildlife Society for decades, culminating in his position as President starting in 2014. He has played an active role in bringing Canadian issues to the attention of The Wildlife Society, and in bringing its annual meeting to Winnipeg, Manitoba in 2015. He teaches numerous wildlife-related courses in the Department of Environment and Geography, and is well-known and appreciated by students for his positive and enthusiastic support of their research efforts. His research focuses on practical applications of ecosystem management to conserve wild species, with a particular focus on conservation of North American grouse.
